Quartz Countertop Chip Repair  
Project Size: One hour of labor or less.  
Scheduling Contact: Duane Steen @ 651-483-1576  
Technician Fee: \$75.00

Chip Repair Protocol:

Clean chipped area & prep for repair.  
Determine what material should be used for repair; epoxy or Hot Stuff  
Color match epoxy resin to countertop color if applicable.  
Fill hole.  
Let epoxy/Hot Stuff harden.  
Scrape off excess residue.  
Clean repaired area.

\*Our technicians are trained and certified and do their best to color match, however we cannot guarantee the repaired chip will blend in perfectly with your countertop. We use Hot Stuff whenever possible because it most accurately resembles clear quartz which is found in most quartz countertop colors and has similar reflective properties.
